

2018
CESBC Evaluation Conference
What's In Your Evaluation Toolbox?

Post-Conference Survey Results at-a-Glance

The conference was a success.

The conference was sold out and drew a large audience from across BC:

- 80% of attendees were from the Lower Mainland and 20% were from the Island, Interior, or out-of-province.

150
attendees

The conference was of value to attendees. Fifty-two people or 35% of conference attendees told us:

- The conference was **worth while** (said by 88% of post-conference survey respondents).
- They would **recommend the conference** to a colleague (said by 87% of survey respondents) and
- They would **attend next year** (77% of survey respondents).

I learned a lot. It was a fun and interactive experience

It was a compact schedule with lots of great talks.

The conference was re-energizing and had lots of great learning!

I came away from the conference with tangible skills I can apply in my own evaluation practice.

Next year please.....

- Continue to share tools and tips
- More hands-on sessions
- Focus on skills-building
- Draw in people from outside of the health sector
